

C4E400V
C4E450V
C4E500V

The Cargo C4E400V-500V for heavy duty is a range of electric trucks with ergonomic solutions, advanced technology and top level performance. They are designed for demanding lifting duties in heavy applications. Lifting capacity from 4000kg up to 5000kg, lift heights up to 6120mm.

Technical Details	C4E400V	C4E450V	C4E500V
Power unit	electrical	electrical	electrical
Operating type	driver seated	driver seated	driver seated
Rated capacity	kg 4000	4500	4900
Load centre	mm 500	500	500
Load per axle without load, front/rear	kg 3500/3300	3490/3630	3800/3870
Load per axle with load, front/rear	kg 9600/1200	10490/1130	11570/1100

Truck performance and dimensions are nominal and subject to tolerances.
 BT Products AB products and specifications are subject to change without notice.
 All data is based on VDI 2198.

- High visibility and stability. The position of the uprights, which are widely spaced, guarantees excellent visibility and at the same time gives a rigid structure even at great height.
- Large front and rear wheels, which are available in a number of models, guarantee comfort, long life, greater adaptability to the road surface, and extremely easy handling of the truck.
- Various drive programs can be selected by simply pressing the push-buttons on the steering column. The operator can choose between 3 different drive programs, as well as an additional reduced speed setting.
- The overhead guard is fully suspended on silent block elements.
- AC power means exceptional performance levels, combined with reduced energy consumption and lower service and maintenance requirements.
- As well as guaranteeing constantly effective braking action, the use of oil bathbrakes allows savings on routine servicing costs.
- The CAN-Bus simplifies the electrical system by reducing wiring and increases the flexibility of the truck control system.

Truck features	C4E400V	C4E450V	C4E500V
Adjustable fork width	S	S	S
Tilting mast	S	S	S
Twin drive tyres	O	O	O
Controls and instruments
